Experienced FullStack Developer with **over 5 years** of hands-on expertise in project maintenance, troubleshooting, and feature implementation. Proficient in full-stack development, specializing in technologies such as Next.js, React.js, ExpressJs, and databases. Adept at **collaborative teamwork**, meeting deadlines, and following scrum-like methodologies. Previous roles include significant contributions to a design system migration and hands-on experience in web dashboard and API development. Possesses a strong foundation in diverse technologies and a proven track record of **successful project contributions**.

EXPERIENCE

Auxis, FullStack Developer — USA (Remote in Colombia). Nov 2023 - Present

- Responsible for maintaining and troubleshooting existing projects, implementing new features, and overseeing database administration for optimal functionality. Proficient in full-stack development with NextJs and ReactJs, with additional backend contributions using ExpressJs. Demonstrates effective time management, consistently meeting deadlines, and actively participates in daily meetings following a scrum-like methodology. Plays a crucial role in advancing ongoing projects and addressing neglected ones, contributing to a results-driven and collaborative team environment.

Tech Stack: TypeScript · JavaScript · React.js · Node.js · MySQLServer · Material Design · Next.js · HTML5 · CSS · Azure DevOps

TicketSOFT Colombia SAS, FullStack Developer (Freelance) — Neiva, Colombia (Remote). Jul 2022 - Present

- Develop and maintain features of a web dashboard written on the back in PHP and Codeigniter and on the front with JS and JQuery.
- Making from scratch new dashboards, APIRest, and Telegram Bots. All these are written in JS with Node and React.

Tech Stack: TypeScript · JavaScript · Angular · React.js · Node.js · PHP · MySQL · Redis · CodeIgniter · Bootstrap · Raspberry Pi · jQuery · HTML5 · CSS

Perficient Latin America, Middle Developer — Neiva, Colombia (Remote). Jun 2022 - Apr 2023

- I collaborated to build from scratch a Next.js project in a mono repo to migrate from an Angular e-commerce website to improve the SEO and performance creating React components and his documentation in Storybook for a new design system using good practices and standards building a scalable code base.

Tech Stack: CI/CD · TypeScript · Next.js · NX Build System · Jest · Storybook · GitFlow · Azure DevOps Server · SASS · Figma.

RC Tecnologías, Junior Developer — Neiva, Colombia. Oct 2021 - Jun 2022

- Develop and do maintenance websites for different companies in LA.

Tech Stack: CI/CD · Tailwind CSS · Gitlab · TypeScript · React.js · Node.js · AngularJS · Angular · SharePoint Server.

DevCode, Junior Developer — Neiva, Colombia. Jun 2019 - Sep 2021

- Create, and deploy online stores, car dealers, and websites from scratch and designs in Figma.
- Optimize SEO and performance websites.
- I have developed a custom CSS library for the styles, based on Material Design.
- Most clients were from the USA and Canada, therefore the primary language for the UI was American English.

Tech Stack: JavaScript · PHP · MySQL · jQuery · SEO · Figma · Angular.
